DID YOU KNOW

THAT POLICE SCOTLAND RECORD MALE CRIME IN THE FEMALE CRIME STATISTICS?

That's Right.

When a male commits a crime Police Scotland will record him as 'female' if he says this is his gender identity

The Assistant Chief Constable confirmed that gender identity is recorded & even takes precedence over scientific evidence: "if DNA gives a scientific analysis of biological sex which does not match… the person's… record, this would not prompt a change of the … record"[1]

We think this is wrong.

Sex is the most significant variable in analysing crime. Data on offending must be recorded by sex. This is vital for service planning throughout the criminal justice system.

IF YOU DO TOO, PLEASE JOIN OUR CAMPAIGN FOR ACCURATE DATA RECORDING BY SEX NOT GENDER IDENTITY

KEEP PRISONS SINGLE SEX XX
